

Cyprus .NET User Group – Event No. 7 January 4th, 2006

We all witnessed the success of the CDNUG Launch 2005 event last December, spiced-up with interesting subject for us developers and – believe it or not – we tend to continue the pace. .NET Developers community in Cyprus prepares the monthly User group event scheduled for next Wednesday with the speaker from Microsoft MEA, one of the CDNUG founders and .NET professionals - [Chad Hower](#).

Chad will present a session about **New DataSet Features in VS2005**. Many of you who used the datasets in VS2003, sure found it useful, but many of you also found it to be lacking in certain areas. In VS2005 those issues have been addressed. For a detailed look at what is new in both the datasets and the bindings, make sure not to miss the upcoming CDNUG Event and join us on Wednesday.

New DataSet Features in Visual Studio 2005 (by Chad Z. Hower)

Learn about the new features in the typed **DataSet** class and the new **TableAdapter** class that are generated by Visual Studio 2005, as well as the tools for designing these classes. Also learn about the new **BindingSource** and **BindingNavigator** components, and see how to use them to rapidly build flexible, data-bound **WinForms** applications.

In this session, Chad will focus on developing with ADO.NET **DataSet** class and associated classes such as **DataSet**, **DataTable**, **DataView** and derived classes from within the Microsoft Visual Studio 2005 development environment. In particular, this session discusses the changes to the typed **DataSet** and the new typed **TableAdapter** that are generated by Visual Studio 2005. It also looks at the designers and tools that offer tremendous flexibility and productivity for developing the data-centric aspects of your application.

An event will take place on Wednesday, January 4th at the conference room of Miramare Bay Resort hotel in Limassol, with start at 19:00. For more information please visit CDNUG website (<http://www.atozed.com/cdnug>).
